

Enjoy Your Life

(Rusty Stone, 2002)

I've a friend who's workin' hard
He never quits he never stops
Dayshift, nightshift, overtime
In the factory at the assembly line

You can't take it with you when you go
Live and love before you're too old
You can't take it with you when you go
Enjoy your life before they lay you low

While I'm out somewhere with my bike
He's workin all day and workin' all night
25 hours a day 8 days a week
No vacation never a break

You can't take it with you when you go
Live and love before you're too old
You can't take it with you when you go
Enjoy your life before they lay you low

He's workin' hard for the company
Just to keep his life in luxury
I know money makes the world goin' round
But you don't need it six feet in the ground

You can't take it with you when you go
Live and love before you're too old
You can't take it with you when you go
Enjoy your life before they lay you low
